

A Study of Fretboard Harmony

The

UnCAGED

System

Part 2

Triad Voice Leading
in Major Keys

Preface

What is the UnCAGED System?

The UnCAGED System is an approach to developing harmonic vocabulary on the guitar that I frequently use with my one-on-one students. I don't really go around calling it the UnCAGED System. That's just a tongue-in-cheek title for this series of books that aims to poke fun at the relentless marketability of the CAGED System, and some of the problems that can arise from studying it. It is *not* intended to suggest that anything about the CAGED System is useless or not worth learning.

I already conveyed my thoughts on all this in the preface of the first book, so I won't rehash them here.

This is a book about exploring possibilities.

What are we exploring this time?

Part 1 was about exploring ways to voice all major, minor, diminished, and augmented triads. Part 2 places them in more of a musical context.

Most of the music we play involves, in some way, progressing through a series of chords. Sometimes we loop the same three or four chords over and over, other times we progress through more chords to make up a larger form. In any case, most of the chords progressions we work with contain some amount of internal logic and predictability. This is what functional harmony is all about.

Generally speaking, every chord you play in a progression has a purpose in carrying the narrative of the music forward. In context, every chord has a sort of gravitational pull suggesting what chord the music ought to go to next. The produced musical effect depends on whether or not you deliver on that baked-in expectation.

For example, it is understood that in a major key, the V chord is a tension that wants to resolve to the I chord. This specific type of tension and resolution is one with which our western ears are highly familiar. However, what if instead the V chord goes to the vi chord? This typically does not sound “wrong” to our ears, and it is something of a resolution, but it's a deceptive one that has a remarkable effect.

In the key of C, this would be like resolving a G major chord to an A minor chord instead of C major. To hear this for yourself, try playing the following two short progressions and compare the way they sound:

| C | Am | F | G | C |

| C | Am | F | G | Am |

Our ears, whether we've trained them or not, will generally find these sounds moving, inspiring, emotive of something (these are good things!), but there is nothing magic about them. There are relatively simple mechanics behind the effects they produce, and as musical practitioners, it is well worth our time to pick them apart and understand them so we may have greater command over them.

To that end, we are exploring possible progressions of triads in major keys. They are organized in the book as follows:

Chord Scales

A chord scale, in this context, is simply playing through the triads found in a major scale in imperfect parallel motion. In each chord scale presented, all triads will be in the same inversion. This is a good way to survey the primary triads available to us in a major key while making observations about how the fingering shapes are adjusted to suit whether a triad is major, minor, or diminished.

I — x

The bulk of what is presented is alternating between the tonic (I) triad and each other triad in its key. First, you'll alternate between I and V, and I and vii°. The dominant (V) and leading tone (vii°) triads are both dominant-functioning chords, meaning they are tensions that will tend to resolve to the tonic. The individual notes in each triad move the minimum necessary distance to the notes of the triads that follows (doing this when voicing chords in an actual piece of music is generally desirable).

Next, you'll alternate between I and IV, and I and ii. The subdominant (IV) and supertonic (ii) triads are both pre-dominant or subdominant-functioning chords. They may be thought of as the “rising action” in the story; they typically precede a dominant chord leading into a cadence or turnaround.

Finally, you'll alternate between I and vi, and I and iii. The submediant (vi) and mediant (iii) typically serve as tonic expansion chords. When progressing from I to either of these, you may notice that there is not a profound feeling of progressing somewhere else. Instead, they color and expand upon the tonic. This is largely due to the fact that each pair shares two common notes (you should be observing this when you play them!).

Falling Fifth Progressions

In a falling fifth progression, the root notes of each chord are descending in fifths. It is a motion that we hear all the time, and it exemplifies a cycling away from and back to the tonic. In our case, the progression is I — IV — vii° — iii — vi — ii — V — I.

I could have included any number of common chord progressions, but the material in this book should give you the skills you need to explore any chord progression in the same manner.

Observations to make

There's something in here for guitarists of all levels, but as with any book such as this, you can only learn what you're ready to learn. The general aim is to broaden your harmonic vocabulary on the guitar, but there many smaller observations to make that contribute to this. When playing anything in this book, you should ask yourself:

- What chord am I currently playing?
- What inversion am I playing?
- What notes make up this chord?
- What chord degree is each note acting as? Which note is the root? The third? The fifth?
- Where is each note / root, third, fifth in this voicing?
- When I move from this chord to that chord, which notes change? Which stay the same?
- Of the notes that stay the same, which degree are they in each chord?
- Of the notes that change, which degree are they in each chord?
- What Roman numeral is assigned to this chord in this key?
- What fingers am I using to play each note? How do I adjust them when changing to the next chord?
- Most importantly, how does any and all of the above sound?

Feel free to ask more questions. Follow your curiosity. These are just important ones that come to mind.

You don't need to run down this whole list for every single thing you do. You can spend time paying attention to what inversions you're playing. Or you can spend time ironing out the fingerings you're using. You could just focus on identifying the degrees in every chord.

Work on what you want to work on as you feel ready. If you feel your brain working, that's a good thing. Do it enough over time, and everything starts to become more intuitive and automatic.

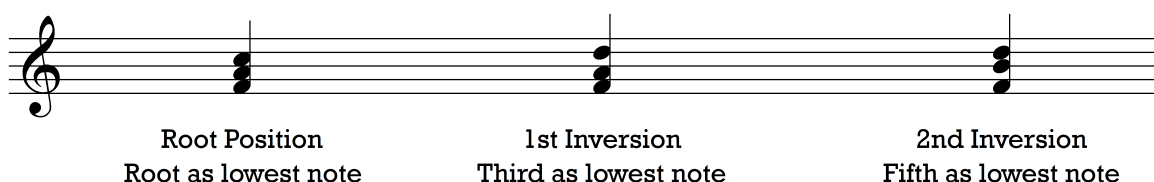

It's all about connecting the brain, the hands, and the ears. They are your holy trinity.

The notation

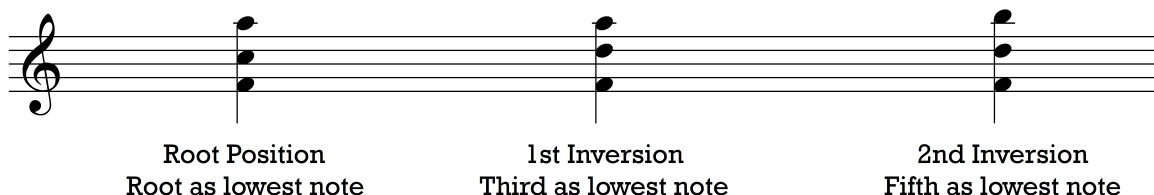

Everything is laid out in two staves. The top staff is in standard notation, and the bottom staff is in tablature.

The numbers above the top staff are my suggested fingerings, which you are encouraged to consider and are welcome to change to suit your playing.

The notes on the top staff are, of course, the actual notes you're playing. Even if you're not carefully reading every single note, the inversion of each chord can be determined at glance based on how the notes are stacked, at least in closed voicings.

Inversions in drop 2 voicings are not as easy to determine at a glance simply because the notes are spaced further apart, but nevertheless possible:

The symbols above the tablature staff indicate the chords you are playing, as well as their inversions. For example, “C” simply means a C major triad in root position. “C/E” means a C major triad in 1st inversion. I typically pronounce it “C over E”, as in a C major triad with E (the third of the chord) voiced as the lowest-sounding pitch. Similarly, “C/G” means a C major triad in 2nd inversion. A lowercase “m” indicates a minor triad, and a degree sign ° indicates a diminished triad. An augmented triad would be indicated with a plus sign +, but none are used in this book, as there is no augmented chord in a major key.

Finally, the tablature staff indicates the strings and frets on which each note is positioned. This should not need much explanation, as most guitarists are used to tablature.

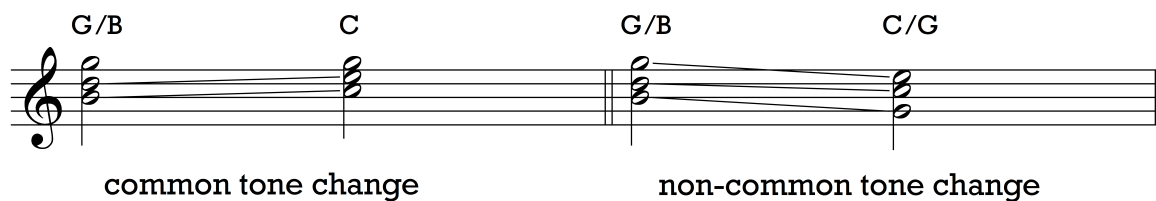

With so many layers to the notation in this book, it can be difficult to follow it all at once. As such, I suggest starting by following only the layer you are most comfortable with reading, which I expect for most would be the tablature. Once you start to get a rough idea of what you're supposed to be playing, start to pay more attention to the other layers. There is no correct order in which to approach this, but you should spend time picking apart each layer and assimilate what it is communicating.

What is voice leading?

Put simply, voice leading is when consideration is given to how the individual notes of one harmony are moving to the individual notes of a subsequent harmony. It is a tremendous topic in both its history and application. Without getting too deep down a rabbit hole...

There are essentially two ways to move between chords: a common tone change, and a non-common tone change. A common tone change occurs when two consecutive chords share at least one note in common, and any common notes do not move.

A non-common tone change occurs when no common notes are available, or there common notes available, but they are deliberately moved.

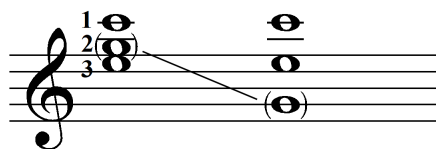

Generally, a common tone change is the more desirable sound. It allows the individual notes to move the shortest distance needed to change the harmony. It all depends on the music and what it is trying to achieve.

In this book, both types of changes occur. You should do your best to observe them.

There are other key components in voice leading as well, such contrary motion, avoiding parallel perfect intervals, the study of counterpoint... But this is all outside the scope of this book.

Closed Voicings versus Drop 2 Voicings

As in the first volume of this series, two types of voicings are presented for all triads: closed voicings and drop 2 voicings. Closed voicings simply place all notes of a chord as tightly together as they can be, similarly to how a piano might voice them. Drop 2 voicings are a little trickier to describe. If you take a closed voicing and number the notes 1, 2, 3 from highest in pitch to lowest in pitch, and then lower note 2 by an octave, you end up with a drop 2 voicing. These voicings have a more open, airy sound than closed voicings.

What about minor keys?

This volume focuses only on major keys. I had originally intended to combine the approaches in this book applied to both major and minor keys all in one volume, but it was sizing up to be a ridiculously large book. So Part 3 will be all of this again in every minor key along with exploration of some of the unique qualities that minor keys present.

Summary

This book contains enough to last you a lifetime. I don't believe that there is a ever point of complete and utter mastery when it comes to understanding harmony, let alone on the guitar. Even among the most elementary musical concepts, there is more to explore, and as long you do, your musical growth will continue. Take it all at your own pace, and stay curious!

The first system of musical notation for the song 'The Sound of Silence'. It features a treble clef with a key signature of three sharps (F#, C#, G#) and a common time signature (C). The melody is written on a five-line staff. Above the staff, there are 16 groups of numbers indicating fret positions for the guitar. The first group is '4 1 1', and the last is '4 1 1'. The numbers are arranged in a way that suggests a specific sequence of notes and chords.

The musical notation for the eighth measure shows a treble clef and a key signature of one sharp (F#). The melody consists of a series of eighth notes: F#, G#, A#, B, C, D, E, F#. The bass line consists of a series of eighth notes: F#, G#, A#, B, C, D, E, F#. The measure is divided into two groups of four eighth notes each. The first group is marked with a '1' above the first note and a '2' above the second note. The second group is marked with a '1' above the first note and a '2' above the second note. The measure is divided into two groups of four eighth notes each. The first group is marked with a '1' above the first note and a '2' above the second note. The second group is marked with a '1' above the first note and a '2' above the second note.

The musical notation shows the 12-tone scale in G-flat major, starting on G-flat (B-flat) and ascending. The notes are: G-flat, A-flat, B-flat, C, D, E-flat, F, G-flat, A-flat, B-flat, C, D. The scale degrees are indicated by numbers 1 through 12 above the notes. The notes are grouped into four measures of three notes each, with a double bar line after the second measure. The notes are written on a single staff with a treble clef and a key signature of two flats (B-flat and E-flat).

Musical notation for the D-flat major scale on the treble clef. The scale is written with a key signature of two flats (B-flat and E-flat). The notes are D-flat, E-flat, F, G, A-flat, B-flat, C, and D. Fingerings are indicated by numbers 1-4. Chord symbols are written below the notes: D-flat, G-flat/D-flat, C major/E-flat, F minor, B-flat major/F, E-flat major/G-flat, A-flat, D-flat/A-flat, D-flat/A-flat, G-flat, C major/G-flat, F minor, B-flat major/F, E-flat major, A-flat/E-flat, and D-flat.

The musical notation for the eighth measure is shown on a treble clef staff with a key signature of one flat (Bb). The measure contains a whole note chord consisting of the notes F2, Bb2, and D3. Above the staff, the fingering for the right hand is indicated as 4, 3, 1. Below the staff, the chord is labeled as F. The tablature below the staff shows the fret numbers for the strings: 5 for the 1st string (F), 6 for the 2nd string (Bb), and 8 for the 3rd string (D).
